

I would like to bring to your attention the dangerous junction of Long Lane and the A529 (see pic).

When exiting Long Lane, traffic from the left is invisible until halfway across the road, and visibility to the right isn't much better. If it wasn't for the 30mph speed limit I imagine there would have been several serious accidents.

What I would like to see is a mirror opposite the junction, giving a view of the A529. Is this something HPC could implement?
